EXPERIENCE

IT Intern

Aftab Cable Network

April 2021 - November 2025, Chicalim, Goa

- Assisted in the setup, configuration, and troubleshooting of wireless network infrastructure for residential and commercial clients.
- Gained hands-on experience in network diagnostics, signal optimization, and customer support.
- Worked alongside technical teams to perform site surveys and ensure optimal Wi-Fi coverage.
- Developed practical knowledge of routers, access points, and network security protocols.

Software Developer Intern

Stanza Infotech

July 2024 - August 2024, Ponda, Goa

- Designed and optimized the relational database to manage job postings, student applications, and notifications, ensuring data integrity and performance.
- Wrote complex SQL queries, joins, and views to support real-time dashboards, application tracking, and report generation for students and the TPO.
- Implemented data validation, indexing, and access control to maintain consistency, enhance query speed, and secure role-based data access.

PROJECT

Kick Game: E-Commerce for Sneakers

- Built a complete e-commerce website tailored for sneaker enthusiasts, featuring a responsive front-end and a secure, scalable back-end.
- Integrated admin capabilities for managing products, brands, and suppliers, with options to add, update, or delete records.
- Designed and maintained a structured SQL database to efficiently manage inventory, user information, brands, and supplier data.

Study Abroad CRM - A Platform for Study Abroad Facilitation

Bodhami (Final Year Project)

- Developing a CRM system to streamline communication and workflow among students, counselors, and administrators for study abroad processes.
- Learning and applying Spring Boot and Angular for backend and frontend development, respectively.
- Analyzing project requirements and contributing to the design of the system's initial architecture and user flow.
- Gained hands-on experience in full-stack development and collaborative project planning in an educational services context.
